PROFESSIONAL SUMMARY

Entry-level Software Developer currently pursuing Full Stack Development training at KodNest, with hands-on experience in Python, Django, SQL, REST API concepts, web development, and data visualization. Completed internships involving backend application development, SQL-based data handling, testing, debugging, and dashboard development. Currently strengthening Java, Data Structures and Algorithms, SQL, and software development fundamentals.

TECHNICAL SKILLS

Programming: Python, Java, C, JavaScript
Web & Backend: HTML5, CSS3, JavaScript, Django
Database: SQL, MySQL, SQLite
Data Visualization: Power BI, Power Query, DAX
Core CS: Object-Oriented Programming, Data Structures and Algorithms, SDLC, CRUD Operations
Tools: GitHub, VS Code, Jupyter Notebook, Linux, MS Excel
AI Tools: GitHub Copilot, ChatGPT, Claude, Gemini, Cursor, Prompt Engineering

EXPERIENCE

Infosys Springboard — Data Visualization Web Application Intern
Oct 2025 – Dec 2025
Virtual

- Worked on a data visualization web application as part of the Infosys Springboard virtual internship.
- Contributed to data handling and dashboard development for analysis of global travel and holiday trends.
- Worked with structured datasets and interactive visualizations to support reporting and analysis.
- Performed testing, debugging, and integration activities during application development.

AICTE – Edunet Foundation — Data Science, AI & ML Intern
Feb 2025 – Mar 2025
GCE, Dharmapuri

- Completed project-based training in Python and data science fundamentals.
- Worked with structured datasets as part of data analysis and machine learning activities.
- Participated in data preparation, analysis, and evaluation tasks during the internship.

PROJECTS

Interactive Data Visualization of Global Travel and Holidays
Technologies: Python, Power BI, Power Query, DAX, SQL
GitHub: github.com/KavinayaP/Infosys-springboard-Interactive-data-visualisation-of-global-travel-and-holidays

- Developed an interactive data visualization project to analyze global travel and holiday trends.
- Created dashboards with KPIs, filters, and visualizations to explore travel-related data.
- Processed and transformed datasets to support analysis and reporting.
- Designed visual reports for country-wise and category-based exploration of travel data.

Vaqelune — Full-Stack Food Delivery Web Application (In Progress)
Technologies: Python, Django, HTML, CSS, JavaScript, SQLite

- Developing a full-stack food delivery web application using Python and Django to connect customers with local restaurants.
- Building features for restaurant browsing, menu viewing, cart management, and order placement.
- Developing restaurant-side functionality for menu management and order processing.
- Using Django Models and Django Admin to manage restaurants, menus, users, and orders.
- Implementing CRUD operations, form validation, search and filtering, and user access control.
- Developing the frontend using HTML, CSS, and JavaScript.

PROFESSIONAL DEVELOPMENT

KodNest — Full Stack Development Program
May 2026 – Present
Bangalore

- Currently undergoing structured training in Full Stack Development.
- Strengthening Python, Java, SQL, HTML, CSS, JavaScript, and Data Structures & Algorithms.
- Building hands-on applications and practicing Object-Oriented Programming, database concepts, CRUD operations, and problem solving.
- Preparing for software development roles through coding, DSA, aptitude, and technical interview practice.

EDUCATION

Government College of Engineering, Dharmapuri
Oct 2021 – May 2025
Bachelor of Engineering in Electrical and Electronics Engineering | **CGPA: 8.10/10**

CERTIFICATIONS

- **Hack2Skill — AI for Bharat Hackathon (Powered by AWS)** — Finalist; built "AI Community Assistant"
- **Goldman Sachs — Software Engineering Simulation** (Forage)
- **Infosys Springboard — Data Visualization Virtual Internship**
- **IBM Cognitive Class — Data Analysis with Python**
- **Deloitte — Data Analytics Simulation** (Forage)
- **Tata — Data Visualization Simulation** (Forage)
